

# Tao of Nature – Elucidations

## Natural Peace and Spiritual Growth

From the one divine, came polarity, the universe, and delightful nature!  
From delightful nature, came natural polarity!  
From the two natural polarities, came even more polarities  
From even more polarities, came Confusion and Plato's dark cave, 'the quick fix', and now unethical-Genetics!  
Which is truly natural, and which is not of the Tao?

With divine, delightful nature and natural polarity, the Tao is still Tao and is nature!  
With Confusion and Plato's dark cave, simple natural truth is compromised, and populous are lost.  
With 'quick fix spiritual growth' in the absence of natural belief systems, global populous are lead away from divine influence, remembrance, and the natural Tao!

With unethical quick fix Genetic alterations, the TREE is no longer a natural tree, and the lost are lead to accept unethical genetic alterations; thus divine remembrance is removed, nature is far, health and happiness will become more distant or elusive.

With Confusion, Genetics, and 'quick fix' the Divine Spark is LOST (see miller experiment), happiness is far, and dear delightful nature is preparing to address the balance with environmental problems.

Those that support Nature in a truly selfless way will pass through the eye of the needle; though they may pay and suffer the quantum atmospheric Karma of those still pursuing extravagant lifestyles, or control over others!

When the materialistic alchemists play with genetics, the Divine Spark within NATRAL-Genetic-Coding (Genetic Remembrance) will be compromised.

The Birds that naturally migrate, innately know to navigate the lay-lines, in accordance to NATRAL-Genetic-Remembrance (also investigate quantum biology); Similarly, populations have the potential to find the divine natural Tao from within Spiritual self.

The honourable quest of seeking truth is a great gift,  
Continue, and truth is near  
Continue, and real truth is near  
Continue, and science is near  
Continue, and profound truth near  
Continue, and divine truth is near

This truth will set you free, though be warned a long journey starts with the first step, and the scales of perception are forever changing:

Consider self and family, before advancing passed truth  
Consider self, family, and others, before advancing passed real truth  
Consider family and religion, before advancing passed profound truth  
Consider Nature to find divine truth; though be warned  
there is no 'quick fix' to divine remembrance!

Selfless dedication to help others is when divine truth is near, thus  
freedom is then near, though materialism is far  
but divine remembrance and delightful Nature near!

## Sociological Systems and Nature

Darwin observed nature, though with incomplete observations, Why?

In the absence of biochemistry, knowledge was incomplete and nature's polarities were surmised.

**Incomplete and summarised, gave the “Survival of the fittest” (Darwin 1859) if Darwin was a biochemist those words perhaps would read: the most Naturally occurring Genetic Mutation would most efficiently adapt to survive within available natural ecological niche's, given current external environmental factors in accordance to quantum-affinity and electron-affinity of the + or - polarities. Darwin did not intend the phrase “Survival of the fittest” to form the foundations for modern Sociological Systems, how can competitiveness “Survival of the fittest” create and maintain Civilisation, Compassion, and Understanding.**

Hierarchical Systems produce competitive belief, behaviour, and materialistic completion; this just fear, confusion, and inevitable frustration, perpetuated by insecurity and some compete self(s) into Plato's dark cave and into criminality.

How can Hierarchical Systems, belief, or sociological systems be the way to permanent peace and harmony; Simply, the polarity of None-Hierarchical Systems is the Key, but this involves reasonable, feasible, and selfless sharing. Applied with balanced moderate thought, religious tolerance and harmony, and with a mutual agenda, the preservation of nature in the absence of corruption.

Truly spiritual suggestions do not perpetuate profit, have no hierarchical belief system, and are not corruptible as the only agenda is of piece, and the preservation of delightful nature.

With knowledge from above and below, working in true, trusting harmony will make piece, though integration of None-Hierarchical belief systems, based on natal-clean technologies are required to help global ecology.

Similar to “as above so shall be below” and as below so above, the polarity of knowledge is spiritual knowledge and science, when both are applied with honesty and moderate balance, peace will ensure the preservation of delightful nature.

Hierarchical thought patterns can only perpetuate insecurity which is just fear. In polarity, None-Hierarchical belief systems based on Nature and the natural Tao will perpetuate mutual trust and harmony in the absence of fear and competitiveness; thus Reasonable, and Feasible, sharing of resources may follow to help make a positive vision of peace.

There has been many climatic warnings, and more to come; plosive change will only occur with self-less effort by all, if we do not try to truly focus on preserving nature, the fighting and selfish swabbing will be insignificant when nature addresses the ecological balance.
